

Task 3: Design System and Component Library

Project Overview

This project involved creating a design system and component library for the Daily Task Manager application. The goal was to establish consistent visual styles, reusable UI components, and clear design guidelines.

Color Tokens

Primary: #6C63FF, Primary Light: #EEF2FF, Success: #22C55E, Warning: #F59E0B, Error: #EF4444, Text Primary: #111827, Text Secondary: #6B7280, Background: #FFFFFF.

Typography System

Poppins is used for headings and Inter for body text. Typography scale includes H1 (32px), H2 (24px), H3 (20px), Body (16px), and Caption (12px).

Spacing System

Spacing tokens of 8px, 16px, 24px, 32px, 48px, and 64px were defined to maintain visual consistency.

Components

The component library includes buttons, text fields, search bars, checkboxes, toggle switches, task cards, feature cards, testimonial cards, and navigation bars.

Variants

Components include multiple states such as Default, Hover, Disabled, Focused, and Error to improve usability and consistency.

Usage Guidelines

Guidelines were provided for color usage, typography hierarchy, accessibility, responsive design, and component usage.

Conclusion

The design system creates a scalable foundation for future development and ensures a consistent user experience across the application.
